

ntcAI

Empowering Vision.

Accelerating Intelligence.

Transforming Industries with Sovereign AI Solutions

POWERED BY NVIDIA ACCELERATED COMPUTING

Who We Are

Your Strategic Partner for AI Transformation

Founded back in 2018 as an AI solution development team under Nhat Tien Chung IT Telecoms, NTC AI now specializes in delivering end-to-end AI solutions tailored to specific industry needs. We bridge the gap between advanced technology and real-world business value.

- > **Mission:** Scalable, secure, and sovereign AI solutions.
- > **Foundation:** Built on the world-leading NVIDIA AI platform.
- > **Full Stack:** From accelerated infrastructure to custom models.

Our Team

Industry Solutions Team

Vertical-specific intelligence tailored for Finance, Retail, and Healthcare.

R&D Lab – PoC Center

Rapid R&D and prototyping to validate transformative AI technologies and applications.

Product Management

A comprehensive suite of scalable AI software and hardware solutions.

System Deployment

Seamless integration and end-to-end delivery of complex global systems.

Alliance & SI

Empowering partners and system integrators to scale our joint reach.

Customer Support

Lifecycle management focused on long-term value and retention.

Solution Team

To transform the NVIDIA stack into industry-specific business solutions

- Develop Industry Reference Architecture (BFSI, Manufacturing, Healthcare, etc.)
- Define Business Use Cases & ROI/TCO
- Work directly with CxOs and Business Owners
- Create strategic proposals for large enterprises

Industries We Serve

Transforming sectors with tailored AI solutions

Industries We Serve (1/2)

AEC

Architecture, Engineering &
Construction

Automotive

Autonomous Vehicles & Smart
Cockpits

Consumer Internet

Generative AI & Recommender
Systems

Energy

Smart Grids & Subsurface
Analytics

Financial Services

Fraud Detection & Algorithmic Trading

Healthcare & Life Sciences

Drug Discovery & Medical
Imaging

Higher Education

Research & Campus Analytics

HPC / Supercomputing

Quantum Computing & Scientific Sim

Industries We Serve (2/2)

Manufacturing & Industrials

Digital Factories & Industrial Twins

Media & Entertainment

Content Creation & Live Broadcasting

Public Sector

Sovereign AI & Civil Services

Hotel & Restaurants

Smart & Quick Services

Retail & CPG

Intelligent Stores & Loss Prevention

Robotics

Simulation & Autonomous Machines

Smart Spaces

Traffic Mgmt & City
Analytics

Telecommunications

AI-RAN & 6G
Networks

R&D Lab - PoC Center

Innovation and prototyping to validate transformative AI applications.

- > **Technology Innovation** Exploring cutting-edge AI advancements to create unique competitive advantages and future-proof digital transformation strategies.
- > **Solution Prototyping** Rapidly building and validating experimental concepts to demonstrate feasibility and value before full-scale development.
- > **Model Fine-tuning** Optimizing pre-trained models with domain-specific data to enhance accuracy and performance for niche requirements.
- > **Reference Pipeline Delivery** Providing standardized, end-to-end architectures that ensure scalable, efficient, and reproducible AI deployments.

Product Team

NVIDIA products & solutions portfolio for Vietnam market

- > Manage the entire NVIDIA product portfolio
- > Build industry-specific bundles (HW + SW + Service)
- > Position products according to customer segments
- > Liaise with NVIDIA on pricing and roadmap

System Deployment Team

Standard, fast, and scalable deployment & delivery

- > Design & implement DGX / SuperPOD / AI Factory
- > Standardize deployment & acceptance
- > Benchmark, tune, and handover for SI
- > Adhere to NVIDIA best practices

Alliance & SI Enablement Team

A helping hand for expanding NVIDIA's Market in Vietnam

- > Co-sell with NVIDIA SEA
- > Enable SI: training, presales, bid support
- > Build enterprise & government pipelines
- > Organize events, workshops, and roadshows

Lifecycle Management Team

Maximize customer's long-term benefits

- > Monitor adoption & GPU utilization
- > Advise on DGX → SuperPod expansion
- > Renewal NVIDIA AI Enterprise & support
- > Identify opportunities to scale

VCCORP

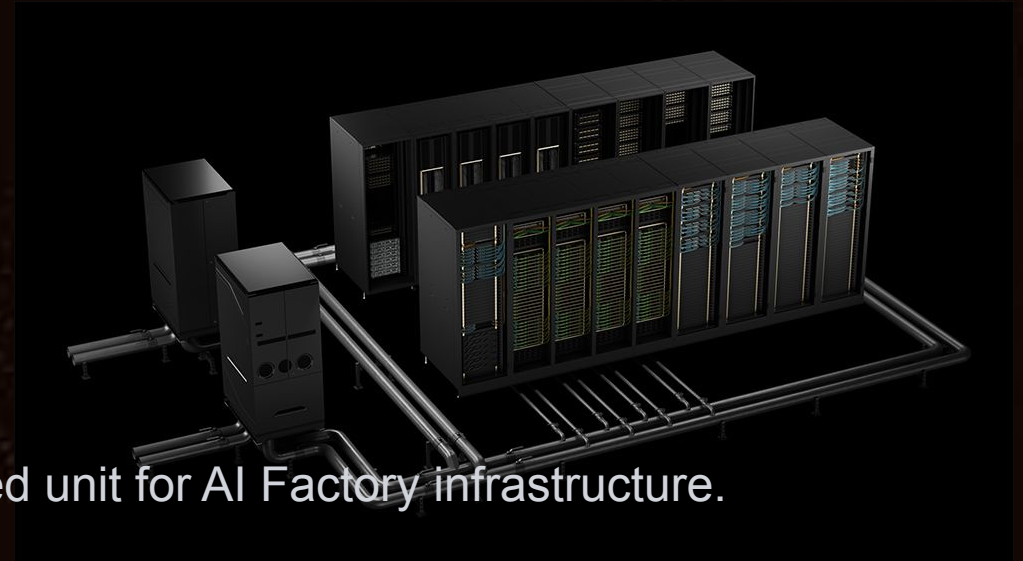

Why Choose Us?

Nhat Tien Chung is the only NPN partner that's capable of deploying large-scale DGX SuperPOD cluster in Vietnam.

Our professionals are trained and certified by NVIDIA, ready to deploy supercomputing platforms based on reference architecture.

Vietnam's Premier AI Factory Partner

- **The Only One:** Vietnam's sole NVIDIA-certified unit for AI Factory infrastructure.
- **Proven Expertise:** Specialized in DGX SuperPOD & BasePOD deployment.
- **Sovereign AI:** Local technical support meeting global performance standards.
- **The 5-Layer Unified System:** Energy • Chips • Infrastructure • Models • Applications.
- **Goal:** Accelerating "Time to Intelligence" for Vietnamese enterprises.

Our Awards

- Enterprise Partner of The Year 2025 / GTC
- Top NPN FY23 Vietnam
- Top Compute DGX NPN FY23 Vietnam
- NPN Elite Level FY23-FY26 Enterprise Business

Your Path to AI Success

Strategy

We identify high-impact use cases specific to your industry data to drive maximum value.

Implementation

Full-stack deployment of NVIDIA hardware (DGX, RTX) and software (AI Enterprise, Omniverse).

Development

Custom model development and fine-tuning LLMs on your proprietary data (RAG).

Security

Ensuring data sovereignty and control with on-premise or sovereign cloud deployments.

Let's Build the Future Together

Ready to accelerate your AI
journey?
